

**REDEYE**

## SELF-LEVELLING 2X RED LINE LASER LEVEL - HORIZONTAL 360° + VERTICAL - 10M VILAPHLV20A

In addition, it comes equipped with a 4-second automatic levelling system and even allows the levelling unit to be locked, giving the line greater precision. It also includes a thread for attaching to a tripod stand, spring support or magnetic wall support.

### Key features

- > Ideal for simultaneous horizontal and vertical levelling applications;
- > Fast and precise levelling;
- > Autonomy of up to 15 hours;
- > Easy to use on all surfaces;
- > Locking mode;
- > Compact design and easy to transport;
- > Range of up to 20 metres;
- > Fixing thread for tripods and brackets

### Specifications

|                                |                                         |
|--------------------------------|-----------------------------------------|
| Automatic self-levelling       | <b>Yes</b>                              |
| Autonomy                       | <b>&gt; 15 horas</b>                    |
| Integrated 1/4" locking thread | <b>Yes</b>                              |
| Laser line width               | <b>100 lux, 3 mm/5 m</b>                |
| Laser output power             | <b>Classe 2 &lt; 1 mW</b>               |
| Laser wavelength               | <b>635 nm</b>                           |
| Leveling unit locking          | <b>Yes</b>                              |
| Line projection                | <b>Crossed, vertical and horizontal</b> |
| Measurement accuracy           | <b>± 0,5 mm/m</b>                       |
| Operating temperature          | <b>0 - 40° C</b>                        |
| Rated power                    | <b>6 V (4 x 1,5 V LR06)</b>             |
| Working Range                  | <b>20 metros</b>                        |
